

KMPS

Disinfectant & Virucide

KMPS Mixing Instructions

To mix the appropriate use-diluted solution of KMPS, first identify the percent solution desired. Second, fill a clean container with the volume of water for the desired percent solution and then add the associated quantity of powder (using the provided scoop) found in the following table. One scoop (1.3 ounces of powder) added to one gallon of water will yield a 1% solution.

Quantity of Water	0.5% Solution	1% Solution	2% Solution
1 Quart	0.15 ounces	0.325 ounces	0.7 ounces
1 Gallon	0.65 ounces	1.3 ounces	2.7 ounces
10 Gallons	6.7 ounces	13.4 ounces	26.7 ounces
50 Gallons	33.4 ounces	66.8 ounces	133.5 ounces

The enclosed scoop with the 10lb pail is 1.3 oz for your convenience.

10 minutes is maximum necessary contact time.

One gallon of solution is sufficient to treat 135 sq. ft.

Solutions are stable for 7 days.
